

I am writing in opposition to these bills. The continued erosion of our State and federal constitutional rights must end. It is common knowledge that protection orders are rarely successful in their stated objective. What is the point in creating more restrictive laws and regulations when enforcement is lacking? Not to mention that, when enforced, a hand slap is given for punishment? Please stop diminishing constitutional rights while allowing convicted felons to serve minimal time, only to be returned to society to continue their criminal activities.

The practice of eroding constitutional rights while supposedly serving law-abiding constituents of the "Constitution State" is contrary to the given nickname of our state. How can this continue? Please help make it stop!

Respectfully,
Randall Pawlikowski,
Lisbon, CT
